

How to View a Multi-page PDF Document as a Slideshow

Any multi-page PDF document can be viewed as a slideshow by making a few easy changes to your Adobe Reader preferences:

- Open the PDF document using Adobe Reader 8 or 9.
- From the Main Menu choose Edit → Preferences.
- Under Categories, click Full Screen.
- Select the checkbox Show Navigation Bar.
- Select the checkbox Left click to go forward, right click to go back
- Click OK.
- From the Main Menu choose View → Full Screen Mode.

As you set up the Full Screen preferences, note that you can choose to automate the slide advance process or even choose a fancy transition between slides, plus other options. Experiment! And test your results!

Note: These instructions apply to Adobe Reader 8 or 9. Download the latest version of Adobe Reader (it's free) at www.adobe.com – just look for a link to it on their home page.
